Allowable Subject Matter

3. Claims 1-30 are allowed.

4. The following is an examiner's statement of reasons for allowance:

As to claims 1-10, the present invention is directed to a method for tuning an integrated circuit on an integrated circuit chip.

Independent claims 1, identifies the uniquely distinct steps "selectively programming fuses of bank of fuses on the integrated circuit chip based on the drain current at saturation measurement; and tuning an operation of the integrated circuit based on a pattern of blown and un-blown fuses in the bank of fuses".

As to claims 11-20, the present invention is directed to an electronic device.

Art Unit: 2829

Independent claim 11 identifies the uniquely distinct “ a corresponding bank of fuses; and means for tuning an output of integrated circuit to be tuned based upon drain current at saturation measurement encoded in pattern of blown and un-blown fuses in the fuse bank”.

As to claims 21-30, the present invention is direct to a method for tuning an integrated circuit on an integrated circuit chip.

Independent claim 21 identifies the uniquely distinct steps “ providing a corresponding bank of fuses on the integrated circuit chip; and tuning an output of the integrated circuit based upon the drain current at saturation measurements made using the drain current at saturation measurement circuit encoded in pattern of blown an un-blown fused in the fuse bank.

The closest prior art, Damn et al (u.s.p 6,762,608) and Bette (u.s.p 6,720,785) discloses conventional method and apparatus for tuning an integrated circuit on an integrated circuit chip, either singularly or in combination, fail to anticipate or render the above limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
